

AYUSH SHRESTHA

 (217) 904-3066 |  iamayushshrestha@gmail.com |  Portfolio: iamayushshrestha.github.io |  GitHub: github.com/iamayushshrestha | Skokie, IL

Results-driven Software Engineer with 4+ years of experience enhancing, maintaining, and optimizing enterprise and automation applications. Proficient in C#, .NET, SQL, and full-stack development with expertise in RESTful API integration, system architecture, and cloud deployment on Azure and AWS. Skilled at improving application performance, optimizing databases, and applying Agile/Scrum methodologies to deliver high-quality solutions.

Languages: C#, Java, C++, Python, SQL, JavaScript, HTML/CSS, PHP

Frameworks & Tools: .NET, React, Node.js, Bootstrap, OSGi, Apache Sling, WCF, MVC, Microservices, Event-Driven Architecture

Databases: SQL Server, Oracle, Firebase, NoSQL, Stored Procedures, SQL Query Optimization

Cloud & DevOps: Azure, AWS, Azure DevOps, Jenkins, CI/CD, AWS Lambda, EC2

Version Control: Git, CVS, MDM, Windchill

Other Skills: Warehouse Management Systems (WMS), Manufacturing Execution Systems (MES), PLC Integration, OPC UA

Software Developer– E80Group Inc. May 2021 – Present

- Enhanced and added features to existing **C#/.NET** warehouse automation applications, improving overall application performance by 10%+.
- Designed and maintained scalable system architecture following MVC and Microservices patterns.
- Integrated **WMS with ERP** systems (**SAP, JD Edwards**) and PLCs via OPC UA and RESTful APIs.
- Optimized SQL queries, stored procedures, and database schema for improved performance.
- Deployed high-availability Windows Services on Azure to improve uptime by 20%.
- Integrated LGV, Palletizer, and Conveyor **Data streams** into the warehouse management system via OPC UA and **Resful API's**, enabling real-time operational visibility.
- Applied Agile/Scrum methodology to manage development cycles and ensure timely feature delivery.
- Troubleshoot and resolved production issues, reducing downtime by 15%.

Backend Software Developer (Contract) – Itrending Solutions Feb 2021 – May 2021

- Developed AEM backend components using **OSGi**, Apache Sling, HTL, and JCR.
- Integrated Java-based services with front-end components and RESTful APIs.
- Automated deployments using **Jenkins CI/CD pipelines**, reducing release cycle time by 25%.
- Applied Event-Driven Architecture and **Microservices** design patterns for scalability.

Software Developer Intern – Comau Aug 2020 – Dec 2020

- Migrated robotics control packages from **ROS1** to **ROS2**, enabling advanced machine learning integration in **C++14**.
- Implemented ROS1 Bridge for message passing to robotic systems.
- Created detailed requirements, design specifications, and integration test plans.

IT Assistant – Wayne State University, Science Hall Oct 2019 – Dec 2020

- Provided technical support for faculty and staff, resolving hardware, software, and networking issues.
- Managed **Active Directory** accounts and ensured secure network access.

Master of Business Administration (MBA) – University of the People, 2023

Bachelor of Science in Computer Science – Wayne State University, 2020

Smartphone Application Development – Led Agile-based full-stack development using JSP, Servlets, JavaScript, HTML, and XML; implemented JUnit tests.

Personal Portfolio Website – Designed responsive HTML/CSS/JavaScript site showcasing professional work.

Fundamentals of Digital Marketing Certificate– Google, 2019

Volunteer Java Tutor – Collider Altimetrik, 2020
